

Make Your Own Car Garage

What You Need

- Milk Carton
- Permanent pens or paints
- Scissors
- Glue (optional) we would advise using some child-friendly glue to glue the coloured lid on to prevent the lid becoming a choking hazard, however the coloured lid is used for a matching activity too so the lid can always be removed.

Instructions

A great way to recycle and keep their little minds occupied at the same time. Create a milk carton 'car garage', with just a carton and some permanent pens, so children can design their very own garage. When our nursery returns, please bring this with you and we will line them up and see how many we have. The children can also then use these in play within the setting - their very own toy made with their own little hands!
