

Target Game

What You Need

- Toilet roll tube
- Small box
- Set of small balls
- Pens
- Paper
- Nerf gun or large water pistol (*optional*)

Instructions:

This is a great activity for slightly older children. Children can practice trying to knock the balls off either with a nerf gun or water pistol or even by throwing something at them. This can enhance mathematic development if the targets can have numbers on for children to identify the number they hit.
