

Pattern Pencil Control - Fine Motor Skill Enhancer

What You Need

- Piece of cardboard
- Scissors
- Large pen, pencil or crayon
- Sellotape or paperclip
- Plain Paper
- Sequins and Glue (optional)

Instructions

This will be great for mark making and enhancing children's fine motor skills, a great but quick and simple way to occupy little hands and minds.

Cut various patterns into strips of cardboard and allow them to trace the shapes inside the pattern onto paper, we would advise taping or paperclip the card onto the plain paper to prevent movement whilst tracing.

Also, you could use coloured sequins to glue on to the cut-out pattern to then make these into greeting cards for friends and family.
